

The logo features a stylized red diamond icon composed of four smaller diamonds, followed by the word "BREED" in a bold, white, sans-serif font with a registered trademark symbol.

A BETTER FIRESIDE AWAITS

SMOKELESS FIRE PITS

LIVE-FIRE COOKING ♦ FIRESIDE FURNITURE

 **MADE IN PENNSYLVANIA**

WHY BUY BREEO

We removed the pain points of the fireside gathering so you can reconnect with the passions and people that bring you joy, and we'll help you feed your fire.

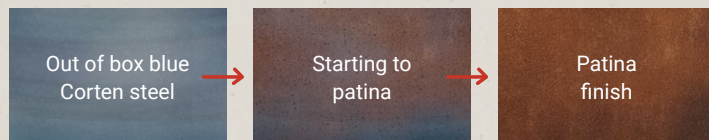

Breeo Smokeless Fire Pits are manufactured in Pennsylvania with thick gauge, stainless, and Corten steel, so you don't have to worry if your fire pit will last for the next season or years.

CORTEN STEEL

PATINA PROCESS

Stylish and built to last, Corten steel develops an intentional patina over time that serves as long-lasting protection and a strong aesthetic choice for those with a more grounded taste.

SMOKELESS TECHNOLOGY

STEP 1

X AIRFLOW

The X Airflow® is a raised air vent design on the bottom of the fire pit that enables oxygen to feed the fire even after significant ash build-up.

STEP 2

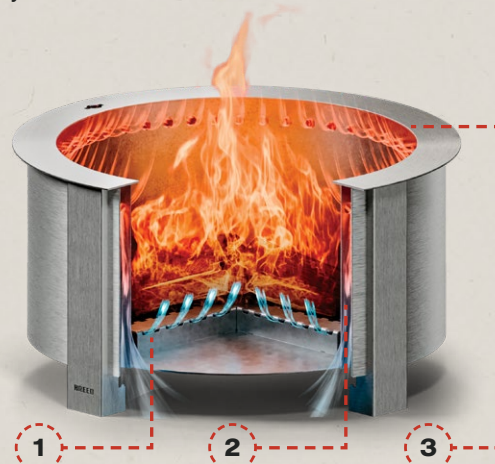

DOUBLE WALL TECHNOLOGY

Air enters through the bottom of the double-wall cavity while the fire heats the sides of the pit. Hot air rises through the gap between the two walls as the fire burns.

STEP 3

SECONDARY COMBUSTION

The hot air then exits the double wall through holes around the rim. This pressurized, heated oxygen mixes with the smoke and causes secondary combustion or reburn.

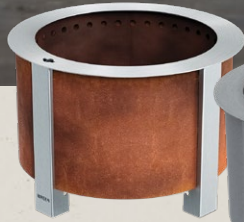

X Series 24 Corten Fire Pit
Available in Stainless Steel

X SERIES

FEED YOUR BACKYARD

Our flagship smokeless fire pit, the X Series, is built to last and designed to ensure a smokeless experience. It's the perfect centerpiece for outdoor gatherings.
